

Hear Technologies' Digital Solution to the Scribble Strip *No more hand-written or printed channel labels*

Sep 6, 2019

Huntsville, AL – Hear Technologies will be releasing the newest accessory for Hear Back PRO Mixers – the digital overlay. This ultra-thin faceplate upgrade features electronic labeling with high contrast graphical displays for channel labeling and mixer status. This time saving and easy to read solution to the standard scribble strip simplifies channel identification for end users. Program labels for all PRO Mixers using the Hear Back PRO iOS App or via a simple text file editor from a Mac or PC.

The digital overlay's status window is a 128 x 64 dot matrix dual color (yellow/cyan) graphical display that allows for up to 4 rows of 12 characters to display the Mixer's name, address, and its status information. Above each channel knob is a 96 x 16 dot matrix graphical screen for displaying up to 9 alpha, numeric, special character, and custom symbol characters.

The digital overlay connects to the PRO Mixer via the expansion slot on the side of the Mixer. This new accessory can be ordered already mounted onto a new Hear Back PRO Mixer or separately to mount onto an existing Mixer.

About Hear Technologies

Hear Technologies offers unique and affordable solutions for personal and professional monitoring systems. We provide options for everyone – from beginners to seasoned pros. Our digital solutions give everyone the mix they need to perform their best. We design our products with the user in mind, so Hear gear is easy to use right out of the box, while providing the best sound in the business. Whether or not you've used a personal monitor mixer, the straightforward layouts of our powerful systems make getting the right mix a quick and effortless experience. Hear Technologies sets the bar high for quality sound, breaking new ground in the market to provide our customers with peak pro audio performance.
